

1. Draw an oval for the head. Make it slightly narrower at the chin.
2. Draw a vertical and a horizontal line through the oval, making a large cross. Curve the line slightly, to show form.
3. Draw eyes on the horizontal line, halfway between the top of the head and the chin. Make them almond shape, about one eye space apart, with another eye space on the outside of each.

4. Draw the upper eyelid partially covering the eye. Make the iris a circle, with the bottom touching the bottom of the eyelid, and with the top cut off by the upper lid. Make the pupil a dot in the center of the iris. Leave a small white dot in the pupil to show a reflection.

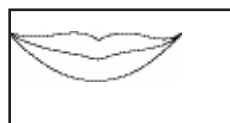

5. Draw eyelashes growing toward the sides of the face. Have the eyebrows repeat the curve of the upper eyelids and make them slightly longer.

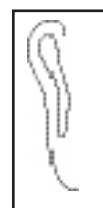

6. Draw a nose using the vertical line as a guide. Locate the base of nose midway between eyes and chin. At the base of the nose, draw three overlapping circles. Darken the nostrils to show two small curving lines at the sides and a curving line at the tip.

7. Draw a mouth below the nose, midway between the base of the nose and the chin. Shape the top of the mouth like two hills.

Make the lower lip a single curve. Make the separation between the lips like two very low hills.

8. Draw the ears like question marks, starting across from the eyes and extending down to the base of the nose.

9. Draw hair at the top of the head, extending above the head and down each side of the face. Erase unnecessary sketch lines.

10. Draw a neck, extending it down from below the ears, using 2 slightly curved lines.
